AIR FILTER

ULTRA 4 - The First washable Air Filter in the world
with Superior Protection,
Inexpensive “Environment Friendly” Cleaning
and Improved Performance!

GUGLatech®

Guglatech-USA.com or BestRestProducts.com

New Air Filtration Era has arrived!

JOIN IT!!!

It was just about time, far too many customers asked us to develop an Air filter with our superior technology and the same or superior protection of the OEM paper one. It has taken us extensive studies to achieve what we do best: **ULTIMATE TECHNOLOGY.**

Main features of the ULTRA 4 Air Filter Design:

1. **ULTRA Protective** with 30-40 microns and a very high BETA Ratio outmatching the OEM paper filters in efficiency and specs. Ideal for **Touring and Off Road adventures.**

2. **ULTRA Performing** - Much better Air Flow allows a better engine response and a new sprint in your driving.

3. **ULTRA 'Inexpensive' - Economic** from now on, no more filter changes, expensive solvent cleaning, oiling or spray, simply air blow or mild soap. It will be ready for mounting in a matter of minutes clean as new and it's totally ENVIRONMENT FRIENDLY.

4. **ULTRA Long Lasting** the high density homogeneous synthetic matrix is robust and will not lose its integrity even after many washings, no cotton thread will get free, no foam particles will enter the combustion chamber while the filter disintegrates, this filter will keep its great characteristics **FOREVER!**

GUGLAtech® Guglatech-USA.com

ULTRA 4 Air Filter:

1. ULTRA Protective
2. ULTRA Performing
3. ULTRA "Eco" Cleaning
4. ULTRA Long Lasting

Be SMART

Our relentless research for your motorcycle MAXIMUM PROTECTION, maintenance cost **TOTAL ELIMINATION**, and continuous product creation and evolution has taken another step ahead with this **REVOLUTIONARY Air Filter**.

Whatever your bike configuration has, OEM exhaust and engine management, After Market parts and new EFI maps, if you are looking for the maximum protection in every condition and ultra easy maintenance this is YOUR Air Filter.

Never again aggressive solvents, impregnating mineral or synthetic **oils or sprays** dangerous for the Environment. Instead, simple mild soap and fresh water! We recommend the use of a **100% bio-degradable detergent** in small quantities.

We have focused on a better riding experience, **NOT JUST** on the Race Track Only peak power, better torque and smoother engine run and, being part of our mission, total engine protection and maintenance cost elimination.

The synthetic high density media of this new revolutionary Air Filter, guarantees the optimal protection of the engine both in off-road as well as in Touring.
The Air Flow has been calculated to match the correct power/torque output both in OEM configuration and also on middle tune-ups for "street" sport riding.

Ultra Easy Mounting on R1200 GS /GSA.
